

第 475 回 日本医科大学医学会 特別講演会

**日時：平成 29 年 4 月 7 日 (金)
18:00 ~ 19:30**

会場：大学院棟 地下 2 階 第 3 演習室

演者：Anis Contractor 先生

(Associate Professor, Director of Graduate Studies, NUIN, Department of Physiology, FSM, Department of Neurobiology, WCAS, Northwestern University, USA)

演題：Life without kainate receptors; insights from kainate receptor knockout mice

Kainate receptors are a class of synaptic glutamate receptors that are primarily modulators of synaptic transmission, and have a strong influence on processes that control synaptic development. In this lecture I will discuss studies that we have performed analyzing the function of these receptors using mice with targeted mutations in the kainate receptor genes.

**主催：日本医科大学医学会
担当：感覚情報科学**

※ 本講演は大学院特別講義 B に認定されております。
